

CryoHealth^o

The NEUROSONIC Matrass, Recliner and Bed

UNIQUE FEATURES

- The Neurosonic technology is based on sensory tissue stimulation with very low-frequency vibration.
- The built-in elements transmit the vibration, focusing the stimulation on certain body parts or the whole body simultaneously.
- As the vibration advances all the way into the deepest tissues, this natural mechanism affects the body and the mind via the autonomic nervous system, offering a relaxing, restorative or activating moment.

INCLUDED PROGRAMS

You can use the mobile application to easily select ready 10-40 minute programmes for relaxation, activation, and recovery.

DURATION	PROGRAM
• 10	• Relaxation
